

OEM Solutions and Services

Medical imaging OEMs have a special business, and very specialized requirements.

You want to concentrate on your core business: Imaging modalities, innovative viewing tools, image management, and enterprise connectivity. You don't want to spend valuable internal resources on peripheral solutions and support services! **We can help!**

Data Distributing provides complementary digital solutions and services, that take your installation and support headaches away!

We Build...You Brand

Select from a range of compliant hardware and software solutions:

- Customized Archives for Imaging Centers and Single Modalities
- Automated Dicom CD station
- Disaster copy with shelf management
- Medical Record / ROI copy solutions

You Sell.....We Support!

Choose from a range of helpful integration and on site professional services:

- Customized software integration with your viewer and reports
- Solutions build and testing
- End User installation of hardware and OEM's software
- End User installation of turnkey branded solution
- Onsite end user training on your behalf
- 24/7 end user help desk with tech support summaries to OEM
- Warranty renewal services
- OEM field service training

A Testament to our Commitment

"Data Distributing provides us with total turnkey solutions combining hardware, software and professional services, and have performed over 100 installations in the US, Canada, and Latin America, for AGFA. They have provided excellent support for us. I have been impressed with Data Distributing's response and follow-through to questions and problems."

--Richard Jung, Technical Marketing Manager, AGFA Global Marketing

We've Got You Covered

With over 600 installations, we know Data Distributing can help your company deliver total solutions, without draining valuable development, installation and support resources!
