PRESS RELEASE

FOR IMMEDIATE RELEASE

Data Distributing Offers DISC Blu-Ray and QStar Archive Management Software

Laguna Hills, CA, January 23, 2006 – Following the recent announcement of strategic partnership agreements with QStar Technologies, Inc. (Mary Ester, FL) and DISC Storage LLC (Cupertino, CA), Data Distributing LLC announced their plans to highlight QStar's Archive Management Software and DISC's Blu-Ray Storage System, as part of D-Essentials, a complete line of digital solutions, at the upcoming 2006 HIMSS Annual Conference & Exhibition, Feb. 12-16, in San Diego, CA.

Attendees visiting Data Distributing at booth #2316 will have the opportunity to learn more about the various components that make the D-Essentials line the perfect solution for any facility regardless of size. Offered in simple modules or phased, end-to-end deployment, the "D-Essentials" line imports, digitizes, archives, and distributes images and data effectively and affordably. Emphasis on the importance of providing affordable digital solutions that perfectly sync application software and system hardware with customized integration, training, and support services is the primary focus and goal of Data Distributing. Their traditional mass storage line expands to showcase their new partnerships with the product lines from QStar and DISC.

"We are very excited about the opportunity to offer the product lines from DISC Storage and QStar Technologies. Data Distributing has an excellent record of providing leading edge DVD-R library archiving solutions for critical medical applications, unique to the market. Our customers demand next generation WORM optical technology with larger density, higher transfer speeds, lower costs, and compatibility with older DVD-R systems. The Blu-Ray DVD-R line from DISC fits these requirements perfectly."

The Archive Management Software line from QStar has set the standard for Storage Management. QStar has continued their product evolution to provide products with even greater performance and security that meet and exceed a facilities core data needs. The unique ability to integrate with; and support a wide range of archival media and various computer platforms, make choosing a storage management solution easier than ever before.

The addition of these components, to our D-Essentials line give Data Distributing the ability to provide additional options for the security, accessibility and value that our customers demand and deserve!" said Nancy Fisher, President and CEO of Data Distributing.
