PRESS RELEASE

FOR IMMEDIATE RELEASE

Data Distributing's CD Burning Solution Selected by Stockton MRI

March 14, 2007 – Santa Cruz, CA - Data Distributing, a leader in turnkey DICOM solutions, today announced that Stockton MRI & Molecular Imaging Center, Inc., has chosen the DICOM CD Station, an automated CD burning solution for distribution of patient images. Value-Added Reseller, D2 Digital Solutions will provide this solution to Stockton MRI.

"We purchased Data Distributing's DICOM CD Station from D2 Digital Solutions, and are thrilled with the results," says Stan Dobretz, Administrator and Chief Technologist for Stockton MRI. "It was very easy to install and interface with our equipment. The CD Station's RSVS Viewer has a friendly, intuitive interface, which the Physicians seem to really like. The custom CDs and splash screen it creates are great marketing tools for our facility to give referring physicians. The remote burning capability has streamlined the work flow by eliminating all the steps of the manual labeling and printing processes. It really saves us time."

DICOM CD Station is a bundled CD burning solution comprised of Rimage disc publishing system including thermal imprinting capabilities, IHE tested application software, and embedded DICOM viewing software. DICOM CD Station resides on a PACS network retrieving DICOM, patient images and burns them to disc for referring physicians and patients.

"Imaging centers are constantly seeking ways to improve profitability, increase patient throughput, and market their facility," says Nancy Fisher, President of Data Distributing. "DICOM CD Station enabled Stockton MRI to reduce film costs and we are thrilled to have provided them a solution that met and exceeded their expectations."
