

Fast Silent Cube:

WORM based Spinning Disk Archive with Quadruple Redundancy!

80% less energy consumed compared to others.

Data Distributing now offers the Fast Silent Cube, a revolutionary IT solution for archiving that is more reliable and cost-efficient than traditional NAS/SAN storage.

- Unbeatable price-performance-ratio
- Less expensive than SAN storage
- Guaranteed data stability & availability
- Easy implementation & administration into SAN & NAS environments
- Lowest power consumption in the industry
- Real Green-IT solution

Fast Silent Cube is Network Attached Storage (NAS), up to 5 times less expensive than DAS/NAS/SAN.

- IT Managers sleep better at night with Fast Silent Cube's **Quadruple Redundancy** (4x secure as RAID-5).
- Fast Silent Cube is truly the **first "Green" storage device**. Its low energy consumption will save your facility tens of thousands of dollars per year!

More importantly, Fast Silent Cube helps **free up valuable online storage (SAN)**. Using intelligent HSM software, you store less frequently accessed data on the Cube, **potentially cutting SAN costs by up to 80%**.

**DON'T KEEP ADDING EXPENSIVE STORAGE TO YOUR SAN.
